LIP BALM · PORTABLE SERIES

BI-INJECTION APPLICATOR TUBE

**D19 tube with a bi-injection applicator head — 8 ml to 25 ml filling,
made for lip balm on the move.**

PCR RECYCLABLE

GLOBAL RECYCLED STANDARD

www.topbeautysh.com

KEY FEATURES

01 PORTABLE RING CAP

The curved ring on the cap enables the tube to be hung on bags or hooks.

02 BI-INJECTION APPLICATOR HEAD

Two materials are moulded in one cycle: soft-touch tip with precise, even dispensing.

03 SIMPLE STRUCTURE

Fewer components, simplified assembly: efficient production and reliable sealing.

INJECTION VS BI-INJECTION

INJECTION APPLICATOR

The single-material option delivers a nice lip-contact feel, yet it is prone to swelling and deformation at the tube tip, unlike our bi-injection version.

VS

BI-INJECTION APPLICATOR

Two materials, formed in a single cycle: structural stability and smooth application feel.

Two materials formed in one shot hold their shape under pressure — a firmer structure and a softer touch on application.

| SIZE & COLORS

8-25_{ml}

- **D19 tube diameter - slim, pocket-friendly profile**
- **Filling range from 8 ml up to 25 ml**
- **Colors of your choice - full custom colour matching for your brand**
